Dis Advantages

conclusion

in our presentation

3. first What is Ems?

It's one type of Application which can maintain the details of employee working in company

It maintains the information about various types like personal & officials.

4. We can see, required software of our project.

Our project is making in java language & we use eclipse for java IDE.
& We also use Xampp for my sql database.

5. Objective for our project

Our project explain that task of maintaining records of employee or customer of company.

It store employee information & it's also store provide functional reports.

Objective of our project is including or dealing will all.

6. Here, flowchart of our project

Login page & inside there will be Username & password boxes. Then after successfully login. Four option appear

Add employee

view employee

Update employee

& Remove Employee

In entering first Add employee .here, Information box there asking some details of employee like a name, number, address , mail etc...

In second option view employee where we can view employee details.

In third update employee , here we can change or update employee details , like a number, salary etc...

& last remove employee , it's remove employee or delete employee details

7. Here, purpose of our project like a

It's manage employee in a better way.

it's very easy to find information related to employee.

It give date of hiring and retirement.

it's also maintains the salary ,attendance & event's.

8. Here, scope of our project like a

Project work in PC's with employee & it's very easy

At the same time we can editing or update in employee details.

9. Next existing system.

The records are maintained in registers.

Time consuming process.

Complicated searching, editing & updating.

(SAME IN PPT READ)

10.A lots of advantages of project like a

Provide computerized system for maintaining records.
More efficient & reliable.
Less time consuming and easy to use.
Huge data storage with less computer memory.
Avoid Human errors & efforts for Maintaining daily data.
Avoid Data manipulations.
Also avoids Data inconsistency & redundancy
(**SAME IN PPT READ**)

11. Some disadvantage like a

Increased arrogance
Confidential & security risk
Lack of experience
(**SAME IN PPT READ**)

12. Conclusion

The whole project is operated by computerizing system. employee management work in offices, schools, library. Etc.
This software keeps record of employee's work, Attendance. And generates the salary slips.
It's easy to store information & news of employee.

13. THANK YOU EVERYONE

Wait for asking questions

- Answer must be starting from “ **we can** ”
